Code of conduct for online services

All Saints PCC want everyone attending and participating in online services to be safe. The PCC therefore requests that all attendees adhere to the code of conduct below:

Everyone attending online services should:

• display a safe and appropriate background.

• alert other household members that they are attending an online service.

• ensure that clothing and language is appropriate for a public, all age event.

• keep microphones switched off unless requested to switch on.

• not reveal personal or sensitive information, passwords etc online.

• ensure any children to be accompanied by adults visible in room.

• be identifiable by their visible device name.

• be aware that the service may be recorded, and that your attendance indicates your acceptance of this.

In addition, those leading and managing the service will ensure:

- anyone threatening the progress or safety of the service will be muted/blocked/removed.
- a leader or PCC member who has received safeguarding training is present.
- only those actively participating in services will be visible on any recording of service uploaded to YouTube.
- safety of online services to be reviewed regularly.

A full risk assessment for online services is available from the Parish Office or can be read on the church website. Additional guidance is available for streamed services.
